

Ycity 2009 – dream it, build it, be it!

Ycity is a temporary city build in a factory hall in Roskilde 20-26 July 2009. A city inhabited by 150 young people from Europe. A city based on the citizen's dreams and personal participation.

You show up with an idea about a change of your city, your life or our society. In Ycity 2009 you test your idea through a project. Together with others you develop and explore how to bring your idea to life! It could be a project about making a film or creating inputs to how we stop global warming.

When you leave Ycity 2009, you will bring home 1 future action that can make the world a better place. That way Ycity continues in your city.

Ycity 2009 last 7 days from Monday to Sunday and it is divided into 3 phases:

- The Rise of the City, where the focus is on the establishment of the relations between the citizens and the establishment of the city.
- City Life, where there are a lot of parallel actions in the different projects. To gather the actions in the city there will be daily City-meetings.
- The Beginning of the Glocal Change, a common workshop Saturday, where you reflect on what you have learned and on this basis create an action, which you will take with you home. An action performed local in a global context.
